

Come and Join the Dance: **a creative approach to movement for children with special needs**

Jane Guthrie (MCSP UK, B. App. Sc Phty, MAPA, Grad Dip Movement and Dance and Rehabilitation) and Jan Roydhouse (Dip Teaching MKTC, Grad Dip Movement and Dance)

The activities in this book are based on programs successfully used with groups of children with special needs at the Noah's Ark Toy Library, Melbourne. Creative dance in combination with music, voice, percussion and a colourful assortment of properties is used to extend movement activities appropriate to the children. The book is designed to help therapists, teachers and parents to conduct similar movement programs.

'I cannot recommend it too highly- the authors have created a text which I find clear, informative and very readable. The human interest element has been woven in so that the rhythm of the text is not halted. The warm liveliness of the text matches the heart warming experiences in the pictures and the whole is readily available to the lay person',
Judith Pippen, (Lecturer in Movement Studies, Drama Department, Brisbane CAE)
